Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 through 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Volkswagen official factory repair manual for model year 1999 Jetta/Golf/GTI.

3. As per claims 1 and 7, Volkswagen discloses means for storing a plurality of control parameters for the different vehicle versions, means for storing a version coding for customizing the vehicle controller for a predetermined vehicle version on pages 1-29 through 1-33, the version coding having a plurality of bit positions on page 1-30, and means for indirect selection of control parameters by algorithmic processing of values of a plurality of bit positions of the version coding on page 1-32.

4. As per claims 2 and 8, Volkswagen discloses further comprising means for direct selection of control parameters from the means for storing control parameters as a function of values of individual bit positions of the version coding page 1-32.

5. As per claims 3, 4, 9 and 10, Volkswagen discloses the means for selection is adapted to read control parameters that are contained in the version coding on page 1-29.

Art Unit: 3661

6. As per claims 5, 6, 11, and 12, Volkswagen discloses the control parameters pertain to characteristic values of electric units and generators on page 1-32. Which sensors that are present in a vehicle are programmed into the cluster as being present.

Response to Arguments

7. Applicant's arguments filed 12-22-03 have been fully considered but they are not persuasive. The argument that the manual does not disclose algorithmic processing of the values is not convincing. There must be algorithmic processing. It is an inherent feature. The cluster must have some processing that states if this number is entered, then these features are active. This is algorithmic processing.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
